

Technical Data
wedi Installation Tools & Accessories

wedi® Installation Tools

Overview

In addition to wedi Building Panels, pre-fabricated items, our unique waterproof shower systems and Ecobath simple product solutions – wedi offers a complete product line of tools for wedi Building Panel or Shower System installations. wedi Installation tools and Accessories are made of the highest quality material and are expertly designed to fit perfectly into a wedi system assembly or other installation situations within the field of their craft.

General Limitations

No limitations under common use conditions. NOTE: wedi Washer heads with tabs cannot be used with wedi Building Panels thinner than 1/2" as the tabs would be stopped by the solid substrate. Thus causing damage to the washer and the impossibility to dimple the washer below the surface as needed to maintain a flat building panel surface. Do not use wedi Washers with building panels/backerboards other than wedi. wedi Washers must be installed with wedi Screws to maintain warranty of installation.

For Safety instructions and information about wedi Joint Sealant and wedi Vapor Barrier AEA-VBC 500, please see the dedicated TDS and MSDS on wedicorp.com.

Storage

Keep in original packaging until use with no exposure to weather. Keep small parts away from children to prevent choking.

Disposal

Products can be disposed with attached construction material/waste. Product will not negatively impact ground water. Product cannot decompose.

Warranty
